

BASEL III DISCLOSURE – NET STABLE FUNDING RATIO : As on Jun 30, 2025

The Net Stable Funding Ratio (NSFR) is significant component of the Basel III reforms. NSFR standard require banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress, thereby ensures reduction in funding risk over a longer time horizon. For both funding and assets, long term is mainly defined as more than one year, with lower requirements applying to anything between six months and a year to avoid the cliff-edge effect. Banks must maintain a ratio of 100% to meet the standards.

NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. "Available stable funding" (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required ("Required stable funding") (RSF) of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet (OBS) exposures.

$$\text{NSFR} = \frac{\text{Available Stable Funding (ASF)}}{\text{Required Stable Funding (RSF)}} \geq 100\%$$

The Bank has maintained NSFR well above the minimum regulatory requirements during the Quarter ended on June 30, 2025. NSFR maintained by the Bank as on June 30, 2025 was at 120.99% against 120.32% as on Mar 31, 2025.

The Available Stable Funding (ASF) is primarily driven by the total regulatory capital as per Basel III Capital Adequacy guidelines stipulated by RBI and deposits from retail customers, small business customers and non-financial corporate customers. Under the Required Stable Funding (RSF), the primary drivers are unencumbered performing loans with residual maturities of one year or more, excluding loans to financial institutions.

The Liquidity Risk Management of the Bank is governed by the Asset Liability Management (ALM) Policy approved by the Board. The Asset Liability Committee (ALCO) is a decision-making unit responsible for implementing the liquidity and interest rate risk management strategy of the Bank in line with its risk management objectives and ensures adherence to the risk tolerance/limits set by the Board / regulator.
